The editor,  
Port Stephens Examiner  
psexaminer@hunterlink.net.au

Dear Sir

**CARE FOR OUR ENVIRONMENT**

The horrifying reports that have been coming out of Fisheries Centre at Taylors Beach in Port Stephens last week (June 18) regarding the change in colour of Willis Creek that crosses their entrance was justified. It had to be seen to be believed. One of our intrepid investigators went out to see what may have caused this outrageous acid sulphate pollution event and filed the attached report. It seems this has been going on for quite a few years but the problem is obviously getting worse. When will our politicians stop eagerly getting their pictures in the papers expounding their great deeds spending taxpayers' money on ridiculous environmental projects? To wit Cr. Westbury '\$120,000 boost' in Port Stephens Examiner June 22 and get out and put a stop to these evil actions? Fiddling while Rome burns? Or is it simply where does the buck stop?

Yours faithfully,

  
R. Hayhoe.

I have attached a PDF file covering the subject referred to in this letter, the facts are true.
